Python

Node.js

Express

Next.js

React

Tailwind CSS

PostgreSQL

MongoDB

REST & GraphQL

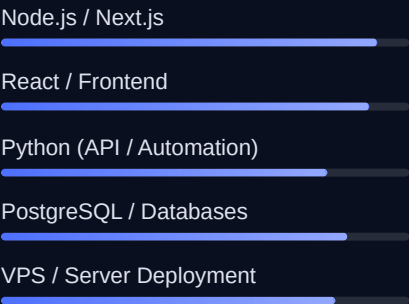

Docker

Nginx

VPS Deployment

Git / CI-CD

PROFICIENCY

LANGUAGES

Bengali	Native
English	Professional

● PROFILE

Full stack developer with hands-on experience building complete web applications — from database design to deployment. Comfortable across the stack with Node.js, Next.js, and Python on the backend, PostgreSQL for data, and modern React-based frontends. Experienced in setting up and managing VPS servers for production deployment. Now expanding into freelance work, delivering fast, well-structured projects for clients while continuing full-time development work.

● EXPERIENCE

Full Stack Developer

PKG IT · 2022 – Present

Dhaka, Bangladesh

- Build and maintain full stack web applications using Node.js, Next.js, and PostgreSQL.
- Design and deploy production infrastructure on VPS servers, including Nginx configuration and CI/CD pipelines.
- Collaborate with designers and stakeholders to turn requirements into shipped features.
- Use AI-assisted development tooling to speed up delivery without compromising code quality.

● SELECTED PROJECTS

Real-time Analytics Dashboard

Next.js · PostgreSQL · Node.js

Built a full stack dashboard for tracking business metrics in real time, with a Node.js API layer and a PostgreSQL backend deployed on a self-managed VPS.

E-Commerce Platform

React · Node.js · Express · MongoDB

End-to-end storefront and admin panel with product management, order handling, and payment integration.

Automation & API Tooling

Python · REST APIs

Python scripts and internal APIs to automate recurring backend tasks and data processing workflows.

● EDUCATION

B.Sc. in Computer Science & Engineering

Daffodil International University, Dhaka · 2017 – 2021

● FOCUS AREAS

- Full stack web development
 - API design & server deployment
 - Database design & optimization
